Big Data Patents Data 3Q 2016

Big Data Patents Data 3Q 2016 is a custom research of TechIPm, LLC (www.techipm.com) based on the analysis of the published patent applications and issued patents in the USPTO regarding the Big Data technologies.
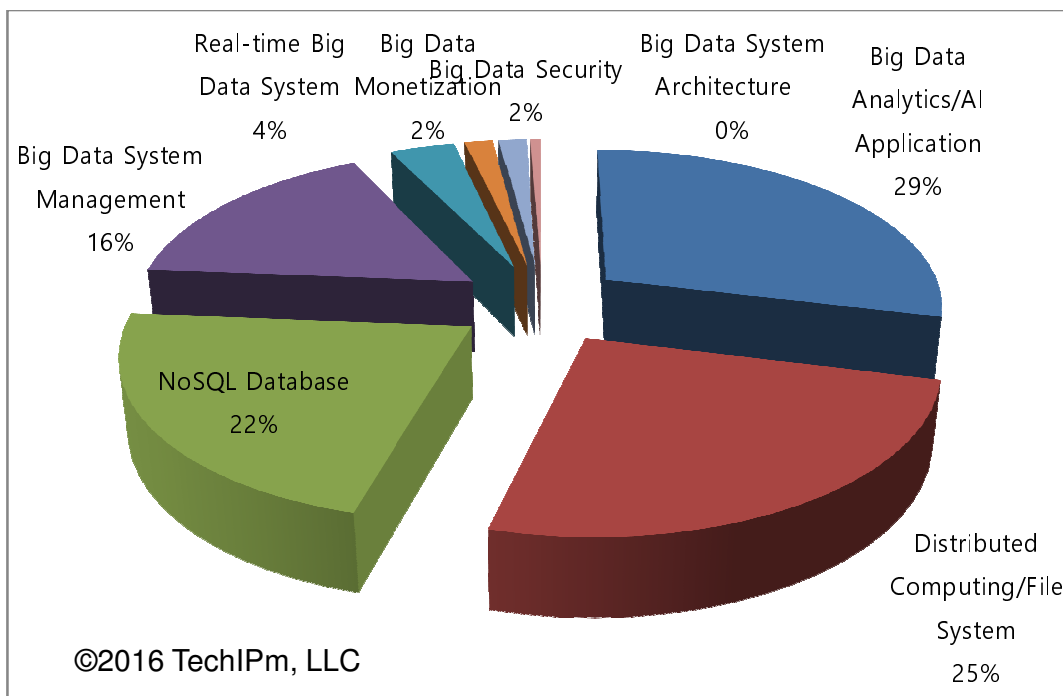

Methodology

1. Search for the Big Data related patents.

- Search the USPTO database for the Big Data related published patent applications and issued patent as of 3Q 2016

2. Review the searched patents for the key Big Data patents.

- Categorize the identified patents by the Big Data ecosystem components
  Big Data Analytics/AI Application, Distributed Computing/File System,
  NoSQL Database, Big Data System Management, Real-time Big Data System,
  Big Data Monetization, Big Data Security, Big Data System Architecture

Deliverables

MS excel file for assignee, patent number (hyperlinked to Google Patent), title, priority year, Big Data ecosystem component category
