

## **UHF RFID Standard Essential Patent Candidates Data 1Q 2015**

UHF RFID Standard Essential Patent Candidates Data 1Q 2015 is a custom research of TechIPm, LLC ([www.techipm.com](http://www.techipm.com)) based on UHF RFID related patents analysis for the market leaders among UHF RFID product manufactures and innovators.

### **Methodology**

1. Search for related patents.

- Search the current USPTO database for the issued patents as of 1Q 2015

2. Review the searched patents for essential patent candidates and applications

- Review the patents
- Categorize the identified patents through the essentiality evaluation process by standard specifications and applications

#### Target Standard Specifications:

ISO 18000 - C

- Patent disclosures in claims and detail description for patent are compared to the standard specifications.

### **Deliverables**

**MS excel file** for current assignee, patent number (USPTO & EPO Families hyperlinked to Google Patent), and standard specifications series & section number
