

## **Wireless Patent Portfolio Evaluation and Development**

TechIPm, LLC (<http://www.techipm.com/>) provides wireless patent portfolio evaluation and development service.

### **Methodology**

1. Auditing for the complete set of essential patent candidates:

- Review the current USPTO database published and issued by a specific assignee.
- Review the current applications pending in USPTO by a specific assignee.
- Categorize the identified patents through the evaluation process by technology and standards.

\*Possible standards are LTE (including LTE-Advanced), WiFi (IEEE 802.11a/b/g/n/ad/af), WRAN (IEEE 802.22), Zigbee (IEEE 802.15), and NFC.

2. Standard analysis:

Specifications for commercial products.

3. Patent portfolio evaluation:

Claim mappings for essential patent candidates.

4. Investigate embodiments that can support the rewriting of existing claim:

- Analysis for invalidity of the essential patent candidate.
- Construct the model claims considering the prosecution history.

### **Deliverables**

1. Patent portfolio landscape by technology and standard specifications.

2. Claim mapping tables.

3. Model claims that make the candidate essential patent.

4. Report for prosecution history and invalidity analysis.
